

11.1 In the table below, pull 10 pieces of explicit text from the selection (what the author says directly) and explain what you can infer from that text. An example has been done for you.

Text	Inference
<i>Chances are, most of the other people in your line of sight are staring at their phones or other devices. And if they don't happen to have one out, it is certainly tucked away in a pocket or bag.</i>	<i>The author believes that everyone has a phone or other device with them no matter where they are.</i>

11.8 Look back over the selection and answer the following questions. Use a different colored font (or put it in bold) to indicate where your answer begins.

1. What is Kamenetz's overall argument?
2. What evidence does she use to support her argument? (Provide at least 2 pieces.)
3. Do you believe her evidence is valid? Why or why not?

11.2 Consider all of the work you've done from the week. Go back over the selection. In the space below, determine 2 central ideas of the selection and write a 3-5 sentence OBJECTIVE summary.
